Professional Development Courses with Quadra Solutions

Vault Data Management for Autodesk Inventor Users

Ensure you get the most from your software with our Professional Development Courses. We are an accredited Autodesk training provider and all of our courses are delivered by experienced, specialist trainers. Our courses are designed to support your training needs and deliver results.

Course Description

This course covers all features in Autodesk Vault Basic for managing files and projects. Delegates learn how to organise and share files, manage file versions, work in multi-user environments and integrate Autodesk Vault with Inventor. The course will also include how to install and manage Autodesk Vault and its file structure. Hands-on exercises representing real-world design scenarios are included.

Who is this course for?

This course is designed for novice users who require comprehensive training in Autodesk Vault.

Objectives

The primary objective of this course is to teach delegates the skills needed to use Autodesk Vault to manage files and projects created with Autodesk Inventor.

Pre-requisites

It is recommended that delegates have a basic working knowledge of Autodesk Inventor. It is essential that delegates have a working knowledge of Microsoft Windows.

Duration

One day.
